## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 8\_Q3

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

In a user registration system, there is a requirement to implement a username validation module. Users attempting to register must adhere to specific criteria for their usernames to be considered valid.

Your task is to develop a program that takes user input for a desired username and validates it according to the following rules:

The username must not contain any spaces. The username must be at least 5 characters long.

Implement a custom exception, InvalidUsernameException, to handle cases where the entered username does not meet the specified criteria.

##### ***Input Format***

The input consists of a string S, representing the desired username.

### ***Output Format***

If the username is valid, print "Username is valid: [S]" .

If the username is invalid:

1. If the username is short, print "Invalid Username: Username must be at least 5 characters long"
2. If the username contains spaces, print "Invalid Username: Username cannot contain spaces"

Refer to the sample output for formatting specifications.

### ***Sample Test Case***

Input: John

Output: Invalid Username: Username must be at least 5 characters long

### ***Answer***

```
import java.util.*;  
class InvalidUsernameException extends Exception  
{  
    public InvalidUsernameException(String message)  
    {  
        super(message);  
    }  
}  
class Main  
{  
    public static void main(String[] args)  
    {  
        Scanner sc = new Scanner(System.in);  
        String username = sc.nextLine();  
        sc.close();  
        try  
        {  
            validateUsername(username);  
            System.out.println("Username is valid: " + username);  
        } catch (InvalidUsernameException e)
```

```
{  
    System.out.println(e.getMessage());  
}  
}  
  
public static void validateUsername(String username) throws  
InvalidUsernameException  
{  
    if (username.length() < 5)  
{  
        throw new InvalidUsernameException("Invalid Username: Username must  
be at least 5 characters long");  
    }  
    if (username.contains(" "))  
{  
        throw new InvalidUsernameException("Invalid Username: Username  
cannot contain spaces");  
    }  
}
```

**Status :** Correct

**Marks :** 10/10
